

Reversed Phase SPE

VertiPak™ C1

- VertiPak™ C1 SPE is very weakly non-polar, hydrophobic sorbent, manufactured using a trifunctional silane and endcapped to reduce the polar secondary interactions associated with surface silanol groups.
- Least retentive of all alky sorbents for non-polar compounds.
- Typical applications include polar and multifunctional compounds in plasma, urine, aqueous samples e.g. corticosteroids in urine.
- Tube format is available in 7 tube sizes.
- Cartridge format is available in 300mg and 600mg size.
- Tubes or cartridges are packaged in zip sealing bag protective from moisture and light.
- Includes a Performance report including the QC results, lot chromatogram and lot recovery test.
