

VertiPak™ HBP

- VertiPak™ HBP SPE is hydrophobic, highly cross-linked polystyrene divinylbenzene copolymer (PS-DVB) polymeric sorbent offering 100% reversed phase interaction and interference-free extraction, compatability with LC-MS or GC-MS.
- Exhibits very high binding capacity over silica, up to 30% of sorbent weight allowing larger sample loads or a smaller sorbent bed resulting in better analyte concentration.
- Needs no addition of amine modifiers, buffers and acids due to no silanol in PS-DVB.
- Typical applications include aromatics compounds, phenols from water, nitroaromatics from water, pesticides from environmental samples, PAHs from oil.
- Tube format is available in 4 tube sizes.
- Tubes are packaged in zip sealing bag protective from moisture and light.
- Includes a Performance report including the QC results, lot chromatogram and lot recovery test.

Chemical structure

VertiPak™ HBP (Polystyrene-Divinylbenzene Copolymer, PS-DVB)

Specifications

Base	HBP (Polystyrene-Divinylbenzene copolymer, PS-DVB)
Particle Size (µm)	30-50
Pore Size (Å)	80-90
Surface Area (m ² /g)	700-800
Carbon Load (%)	-
Endcap	No
pH Stability	1-14
