

VertiPak™ HCP-SC

- VertiPak™ HCP-SC SPE is mixed-mode, chemical modified Vinylpyrazine-Divinylbenzene Copolymer-Sulfonate, (VPZ-DVBS) polymeric sorbent offering both strong reverse phase interaction and strong cation-exchange interaction with interference-free extraction, compatibility with LC-MS or GC-MS.
- Exhibits very high binding capacity over mixed-mode silica-C8/SCX sorbent, up to 30% of sorbent weight allowing larger sample loads or a smaller sorbent bed resulting in high, reproducible recoveries and less solvent usage.
- Exhibits excellent mass transfer and mechanical strength for basic polar compounds in an aqueous sample or a biological fluid sample.
- Typical applications include basic drugs and metabolites from biological fluids, environmental pollutants from water, drugs of abuse and metabolites from urine e.g. amphetamine, methamphetamine, opiate, barbiturate, cocaine, THC.
- Tube format is available in 4 tube sizes.
- Tubes are packaged in zip sealing bag protective from moisture and light.
- Includes a Performance report including the QC results, lot chromatogram and lot recovery test.
